# PROJECT EXPERIENCES

some of the projects we have worked on

## Planting and Launching of Ministerial Regulation No. 2 of 2025 concerning Payment for Environmental Services

### Description

- A part of natural resources management services
- Planting and Launching of Ministerial Regulation No. 2 of 2025 concerning Payment for Environmental Services. This activity was attended by the Minister of Environment, the Regent of Boyolali and the Regent of Klaten
- preparing the design for the implementation of Payment for Environmental Services
- planting and maintenance of trees
- plant monitoring
- This project was funded by Danone
- Project location: **Boyolali – Central Java**

# PROJECT EXPERIENCES

some of the projects we have worked on

## Detail Soil Survey and Land Evaluation

### Description

- A part of natural resources management services
- Providing accurate spatial and technical soil information as a basis for plantation planning and management.
- Determining site specific-based land suitability for Palm Oil Plantation
- identify production-limiting factors from the planning stage through plantation operations.
- Project location: **Batanghari – Jambi**

### Client

Jambi Batanghari Plantation

# PROJECT EXPERIENCES

some of the projects we have worked on

Peat Inventory and Drainability Assessment

## Description

- A part of natural resources understanding services
- Conducted inventorying of peat and mapping peat distribution according to soil characteristics and properties
- Classifying land suitability for replanting according to regulations and standard
- Project location: **Central Kalimantan, West Kalimantan, North Sumatera**

## Peat Inventory

- PT Mitra Aneka Rezeki, PAS Group (West Kalimantan, 2023)
- PT Cipta Usaha Sejati, PAS Group (West Kalimantan, 2024)
- PT Jalin Vaneo, PAS Group (West Kalimantan, 2024)
- PT Nabire Baru and KPMA Wate Asiaina, Goodhope Group (Central Papua, 2024)

## Peat Inventory and Drainability Assessment

- PT Gawi Bahandep Sawit Mekar, TAP Group (Central Kalimantan, 2023)
- PT Perkebunan Nusantara IV Unit Ajamu (North Sumatera, 2022)
- PT Perkebunan Nusantara IV Unit Meranti Paham (North Sumatera, 2022)
- PT Perkebunan Nusantara IV Unit Panai Jaya (North Sumatera, 2022)
- PT Perkebunan Nusantara IV Unit Batang Laping (North Sumatera, 2022)

# PROJECT EXPERIENCES

some of the projects we have worked on

Community Empowerment for Peatland Rehabilitation with Assisted Natural Regeneration

## Description

- A part of natural resources management services.
- Empowering local communities in the restoration of peatlands
- Focuses on educating and enabling community members to actively participate in the rehabilitation efforts, utilizing natural regeneration methods to restore the health and functionality of peatland ecosystems
- Project location: **West Kalimantan**

HCV & SIA Assessment on Palm Oil Plantation Area

## Description

- A part of natural resources management services
- Identifying of high conservation values at local, regional or global levels, including ecological, environmental services, social and cultural values to support the company's commitment to protect conservation value areas
- Project location : **East Kalimantan, Jambi**

# PROJECT EXPERIENCES

some of the projects we have worked on

Feasibility Study Project of Conservation Wapoga-Salaki

## Description

- A part of natural resources understanding services.
- Assessment to determine the viability of implementing conservation program that consist of social, economy and environment parameter.
- Project location: **Papua**

Feasibility Study Project of Biomass

## Description

- A part of natural resources understanding services.
- Assesses factors such as resource availability, technological feasibility, economic viability, and environmental impact to determine if biomass utilization is feasible for a particular project or application
- Project location : **Indonesia (National Scope)**

# PROJECT EXPERIENCES

some of the projects we have worked on

Droneseeding: Effectively Peat Forest Rehabilitation with UAV Technology

## Description

- A part of natural resources understanding services.
- accelerate reforestation efforts and restore ecosystems by efficiently planting trees with aerial seeding technique using drone.
- Project location: **West Kalimantan**

Arrangement of Forest Investment Program (FIP-1) Exit Strategy Documents

## Description

- A part of natural resources management services.
- The scope of project is arranging a strategic plan used as guidance to ensure the objective of FIP-1 program are sustained.

# PROJECT EXPERIENCES

some of the projects we have worked on

Strategic Plan for Development of Carbon Offset in Social Forestry

## Description

- A part of natural resources management services.
- Develop a strategic plan for carbon projects with communities and stakeholders for social forestry.
- Project location: **East Kalimantan**

Capacity Building of Technical Skill for Forest Rehabilitation through Assisted Natural Regeneration

## Description

- A part of natural resources management services.
- Increasing rehabilitation capacity in local community forest.
- Project location: **West Kalimantan**

# PROJECT EXPERIENCES

some of the projects we have worked on

Social and Biodiversity Impact Assessment in Carbon Project Area

## Description

- A part of natural resources understanding services.
- Assessment to determine social and biodiversity impact prior to carbon project due to national and international standard compliant.
- Project location: **West Kalimantan, Jambi**

## Clients :

- USAID-SEGAR
- Lestari Capital-DAEMETER

# PROJECT EXPERIENCES

some of the projects we have worked on

## Accelerating Climate Change Adaptation Investment Planning to Enhance Resilience in Indonesia

### Description

- A part of natural resources understanding services.
- Update and validate the climate hazard assessment based on previous CRD studies for Indonesia's long-term document (RPJPN 2025–2045) and medium-term document (RPJMN 2025–2029) in each sector.
- Project location: **Aceh, East Kalimantan, South-East Sulawesi, North Maluku, Papua**

## Academic Study of Climate Resilience Development

### Description

- A part of natural resources understanding services.
- Update the climate resilience actions based on the results of "Climate Change Adaptation Investment Plan" for national and subnational levels.
- Project location: **Indonesia (National Scope)**

# PROJECT EXPERIENCES

some of the projects we have worked on

LIDO BAGEUR  
Lido Basin Integrated Ecosystem Restoration

## Description

- A part of natural resources management services.
- This program is a Social and Environmental Responsibility program from DANONE managed by BPH
- This program focuses on improving the quality of lake water, strengthening fish farming groups in the lake, implementing low-residue floating net cage cultivation, using technology for monitoring water quality and weather by the community, and protecting land cover in the water source area upstream of Lake Lido
- Project location: **Bogor – West Java**

# EXPERT EXPERIENCES

some relevant  
experiences  
of our experts

## Projects

- Land suitability for cassava in Jonggol, Bogor Regency, **PT Kujang Nusantara**.
- High Conservation Value (HCV) survey with Asean Pacific Consulting Solution consultant (APCS) on **Sinarmas Forestry**, Riau Province and West Kalimantan.
- Land suitability for clove in West Manggarai Regency, East Nusa Tenggara, **IPB University**.
- Due diligence analysis for oil palm plantations of the **PT Rajawali Corp** area in Oku Selatan Regency, South Sumatera.
- Evaluation of land suitability for palm oil plantation **PT Green Eagle Group** in Ketapang, West Kalimantan and South Kalimantan.
- Land suitability for the RTSP (Settlement Spatial Plan) project at the Department of Transmigration in Lombok Barat Daya, West Nusa Tenggara.
- Land Suitability at **PT Sanggam Harapan Sejahtera** in Berau Regency, East Kalimantan
- Land Suitability at PT HAL (**Musim Mas Group**) in Muara Teweh Regency, Central Kalimantan
- Land suitability and feasibility survey of **PT Lestari Kelapa Murni**, Indragiri Hilir Regency, Riau Province
- Land suitability survey and peat verification for **PT Damai Agro Sejahtera** in Ketapang, West Kalimantan.
- Detailed soil survey and land evaluation for paddy field at **PT Huma Indah Mekar**, Tulang Bawang Barat Regency, Lampung Province.
